## Road Construction Update - Oct. 25, 2013

Here is the latest information with the City of Geneva's road construction projects as of today.

The City's 2013 road construction program is essentially finished for the year.

Construction crews started to do punch list items such as cleaning up streets and removing traffic control signs this week. This work will continue next week.

One of the items on the punch list is finishing the ends of many of the driveways on Pine Street, Willow Lane, Grant Street and Ford Street to create a better transition from the new pavement onto the existing driveways.
