Executive Summary:			
<p>Staff has previously evaluated multiple alternative types of polymers based upon effectiveness, feed rates and cost per pound of sludge processed. That evaluation determined that the Solenis was proven to be the best polymer for the sludge at the Geneva Wastewater Plant. For the past few years, the City Council has waived competitive bidding and approved the purchase of polymer for the Wastewater Treatment Plant at a price per pound. A quote for the two types of polymer, due to seasonal needs, has been provided with no cost increase over last Fiscal Year. Staff is recommending continuing the purchase of Solenis - Praestol polymer at \$2.03/lb and Solenis Zetag polymer at \$1.71/lb for Fiscal Year 2025.</p>
