Answering questions from prospective bidders regarding Distribution Transformers.

Q: Could you please confirm if there are any restrictions regarding overseas?

A: No, there are no restrictions regarding overseas.

Q: As per the specifications on page 21 regarding transformer evaluation, do you have a form or Excel sheet that we can use for each KVA design for three-phase, single-phase, and pole-mount transformers? Could you please share the file that needs to be submitted along with it? Also, to confirm bid bond is not needed and can you confirm if the prevailing wages will be applicable for the product to be manufactured in our shop in Oklahoma City?

A: Regarding the specifications on page 21, please disregard page 21. We do not have a form or Excel sheet to use. There is no file that needs to be submitted along with it. A bid bond is not needed. No, the prevailing wage is not applicable to the product manufacturing in Oklahoma City. All transformers should meet current Department of Energy efficiency requirements.

Q: I wanted to inquire if the specifications posted on the website are the only ones available, or if there are additional forms we should be aware of. Additionally, do you have an approved manufacturer list, and would you accept products manufactured in China? I'm referring to the RFP 2025-2026 DISTRIBUTION TRANSFORMERS.

A. Yes, the specifications posted on the website are the only ones available. No, there are no additional forms. No approved manufacturer list and no restriction on overseas.
