

COMMUNITY DATA SNAPSHOT  
GENEVA, MUNICIPALITY  
JUNE 2020 RELEASE

## About The Community Data Snapshot

The Community Data Snapshots are a series of county, municipal, and Chicago Community Area data profiles that primarily feature data from the 2014-2018 American Community Survey (ACS) 5-Year Estimates. As noted in each profile, the data comes from multiple sources in addition to the ACS, which include U.S. Census Bureau, Illinois Environmental Protection Agency (EPA), Illinois Department of Employment Security (IDES), Illinois Department of Revenue (IDR), and the Chicago Metropolitan Agency for Planning (CMAP).

## User Notes

### Margin of error

ACS is a sample-based data product. Exercise caution when using data from low-population municipalities, as the margins of error are often large compared to the estimate. For more details please refer to the [ACS Sample Size and Data Quality Methodology](#).

### Regional values

Regional values are estimated by aggregating 2014-2018 ACS county level data of the seven counties that make up the CMAP region. These counties are Cook, DuPage, Kane, Kendall, Lake, McHenry, and Will.

### Median values

The Census Bureau encourages users to aggregate small levels of geographies into larger areas and recalculate median values for those aggregated areas. Median values are recalculated using grouped frequency distributions for aggregated areas such as the CMAP region.

### Values for municipalities that extend outside the CMAP region

Values derived from CMAP analyses are restricted to geographies that fall within the CMAP regional boundaries. General Land Use, Equalized Assesed Value, Park Access, Water Supply, and ON TO 2050 Indicator table values only represent portions of the the municipality that fall within the CMAP region.

### Municipalities located in more than one county

Data is provided for the county containing the largest geographic portion of municipality.

### Employment values

The Private Sector Employment table features data from the IDES Where Workers Work report. This report includes private sector employment totals for six counties within the seven-county CMAP region, excluding Kendall County.

 CMAP

Universe: Occupied housing units.

\*Excludes households with zero or negative income and no cash rent.

### HOUSING & TRANSPORTATION (H+T) COSTS, PERCENT OF INCOME PER HOUSEHOLD, 2012-2016\*

	Median-Income Household**	Moderate-Income Household***
<b>Housing Costs</b>	40	50
<b>Transportation Costs</b>	23	25
<b>H + T Costs</b>	62	74

Source: Location Affordability Index, U.S. Dept. of Transportation, and U.S. Dept. of Housing and Urban Development.

\*The purpose of the H+T Index is to isolate the effect of location on housing and transportation costs, grouped by common demographic characteristics that form four distinct household types. The values above represent the percent of household income that an average household within each of these types in the region would spend on housing and transportation if they lived in this county. The standard threshold of affordability is equal to 30 percent for housing costs and 45 percent for housing and transportation costs combined. For more information, visit [hudexchange.org](http://hudexchange.org).

\*\*Median-Income Household assumes a household income equal to the area median, with regional average household size, and the regional average commuters per household.

\*\*\*Moderate-Income Household assumes a household income of 80% of the area median with regional average household size, and the regional average commuters per household.

## Community Data Snapshot Water Supply: Geneva

### WATER SUPPLY

CMAQ supports an integrated approach to water resource management, and encourages communities to incorporate water supply and demand considerations into land use, transportation, and infrastructure investment decisions. Assessing demand, price, and loss trends of a community can inform decisions that strengthen regional water supply management, maintain drinking water infrastructure, and manage demand. Click [here](#) to learn more about how communities can coordinate and conserve our shared water supply resources.

### WATER SOURCE AND DEMAND TRENDS OF GENEVA\*

**Primary Water Source:** Shallow Groundwater\*\*

	2003 MGD***	2013 MGD	Percent
<b>Total Water Withdrawals****</b>	2.80	3.70	29.20
<b>Residential Sector</b>	1.80	2.40	30.50
<b>Non-Residential Sector</b>	1.00	1.30	27.10

Source: Analysis of Illinois Water Inventory Program water withdrawal data (2002-2013).

\* Only available for municipalities with community water suppliers providing service to the majority of the community.

\*\* The primary water source of a community is based on the source of the majority of withdrawals from all wells and intakes within the community, including community water suppliers and industrial and commercial businesses. The majority of withdrawals is calculated as an average from yearly data, given year to year fluctuations.

\*\*\* Millions of gallons per day.

\*\*\*\* Total includes all community water suppliers and industrial and commercial wells/intakes within a municipality; private residential wells are not included. Residential sector includes withdrawals identified as residential by community water suppliers. Non-residential sector includes withdrawals identified as non-residential by the community water suppliers and withdrawals from industrial and commercial wells/intakes.

### DAILY RESIDENTIAL WATER DEMAND PER CAPITA

	Geneva			CMAQ Region		
	2003	2013	Percent Change	2003	2013	Percent Change
<b>Residential* (GPCD**)</b>	84.6	110.1	26.2	104.2	87.5	-17.4

Source: Analysis of Illinois Water Inventory Program water withdrawal data 2003-2013.

\* Residential sector includes withdrawals identified as residential by community water suppliers. The prevalence of private residential wells or community water suppliers that provide water outside of the municipal boundary could lead to artificially lower or higher GPCD values respectively.

\*\* Gallons of water per capita per day (estimated unit use). Population values used in sector totals come from the U.S. Census.

## Community Data Snapshot Water Supply: Geneva

### WATER AND WASTEWATER PRICE TRENDS\*

Real price per 1,000 gallons, in 2018 dollars	2008	2018	Percent Change	Annual Percent Change
<b>Drinking Water</b>	\$ 5.04	\$ 6.90	31.2	3.2
<b>Sewer</b>	N/A	\$ 3.89	N/A	N/A
<b>Combined** (if applicable)</b>	N/A	N/A	N/A	N/A

Source: Illinois-Indiana Sea Grant Water Rates Data for Northeastern Illinois, IISG19-RCE-RLA-031.

\* Only available for communities with water utilities and that responded to data requests. Percent changes and 2008 prices were adjusted for inflation using the U.S. Bureau of Labor Statistic's Consumer Price Index for the Chicago-Naperville-Elgin region.

\*\* Some utilities combine drinking water and sewer prices, rather than separating them out as two distinct rates.

### WATER LOSS\*

**Reporting utility:** Not a Lake Michigan permittee

	2017
<b>Nonrevenue Water (Millions of Gallons per Day)**</b>	N/A
<b>Annual Cost of Nonrevenue Water (\$)</b>	N/A
<b>Percent of Nonrevenue Water to Water Supplied***</b>	N/A

Source: Illinois Department of Natural Resources, Lake Michigan Allocation Program.

\* Data is only regionally available for Lake Michigan permittees; water losses from other communities and industrial and commercial businesses are not reported to the state.

\*\* Nonrevenue water is the difference between net annual pumpage (water supplied) and billed, authorized consumption. Non-revenue water includes water that is lost from the system due to underregistration of meters, systematic data handling errors, leakage anywhere within the distribution system, unauthorized consumption, or unbilled authorized consumption.

\*\*\* The threshold for permit compliance is less than 12 percent of water supplied in Water Year 2015, decreasing to no more than 10 percent by Water Year 2019 and all years thereafter. Permittees that exceed the threshold are required to submit a water system improvement plan.

## Community Data Snapshot ON TO 2050 Indicators: Geneva

### ON TO 2050 INDICATORS

ON TO 2050 is the region's long-range comprehensive plan, adopted by CMAP in 2018. The plan includes a set of indicators for quantifying its goals and measuring implementation progress. While many of these indicators can only be measured at a regional level, several can also be tracked at a local level. These have been laid out in the table below, with comparisons to the region's current measure as well as the targets that the plan is aiming to reach by 2050. Visit [cmap.illinois.gov/2050/indicators](http://cmap.illinois.gov/2050/indicators) to learn more.

Plan Chapter	Indicator	Geneva	CMAP Region		Source
		(Current)	(Current)	(Target)	
COMMUNITY	Population located in highly walkable areas	0.0%	41.5%	45.2%	CMAP, 2015
	Jobs located in highly walkable areas	0.0%	38.2%	45.2%	CMAP, 2015
PROSPERITY	Population aged 25+ with an associate's degree or higher	64.7%	45.9%	64.9%	2014-2018 ACS 5-Year
	Workforce participation rate among population aged 20-64	81.8%	80.6%	83.4%	2014-2018 ACS 5-Year
ENVIRONMENT	Population with park access of 4+ acres per 1,000 residents	72.5%	41.5%	65.0%	CMAP, 2013
	Population with park access of 10+ acres per 1,000 residents	32.7%	16.0%	40.0%	CMAP, 2013
	Impervious acres per household	0.26	0.18	0.15	USGS National Land Cover Dataset, 2016
	Daily residential water demand per capita (gallons)	110.1	87.5	65.2	Illinois Water Inventory Program, 2013
	State revenue disbursement per capita	\$391.93	\$286.21*	N/A	CMAP, 2018
GOVERNANCE	Is per capita disbursement at least 80% of regional median?	Yes	Yes for 74% of municipalities	Yes for 100% of municipalities	CMAP, 2018
MOBILITY	Population with at least moderately high transit availability	6.4%	53.2%	65.0%	CMAP, 2017
	Jobs with at least moderately high transit availability	19.5%	55.2%	58.0%	CMAP, 2017
	Percent of trips to work via non-SOV modes	27.1%	30.1%	37.3%	2014-2018 ACS 5-Year

\*Median value of region's 284 municipalities.
